

it and form a magnetic closed circuit, and prevent the magnetic flux external leakages.

13. (Original) A support base as in claim 12 wherein both side of said magnetic material are magnetized to multi magnetic pole, and by magnetic attraction said support base adsorb said compact disc holder that having said magnetic material, and adsorb ferromagnetic connecting material to last end of compact disc holder and form a magnetic closed circuit, and prevent magnetic flux external leakage.

Remarks

The present amendment attends merely to matters of form, namely correction of multiple dependencies to comply with U.S. practice and attention to providing consistent antecedent terminology.

Respectfully submitted,

Jordan and Hamburg LLP
